

Learning to survive: how education for all would save millions of young people from HIV/AIDS

Brussels: Global Campaign for Education, 2004. 34 p.

Title other languages:

[Apprendre pour survivre : Comment l'éducation pour tous pourrait épargner le virus HIV et le sida à des millions de jeunes](#)

Authors:

Jellema, Anne
Philips, Ben

Description:

Universal primary education (UPE) could save at least 7 million young people from contracting HIV over a decade. However, without dramatic increases in aid to education, Africa will not be able to get every child into school for another 150 years. This report sets out why UPE is crucial to halting the spread of HIV/AIDS, and outlines what both rich and poor countries need to do now to enable millions of children to learn ... to survive.
