### Description:

The Hong Kong Advisory Council on AIDS, in its mandate to advise the government on policies relating to the prevention, care and control of HIV infection and AIDS in Hong Kong, developed this new strategy for year 2007-2011. The document serves as the blueprint for the collective AIDS effort in the next five years, in response to the changing local epidemic. This recommended strategy is divided into 3 parts. The first part comprises a brief overview of the current HIV/AIDS situation and programme response. The second part depicts the Strategies framework and identifies current priority areas. The third part delineates targets and indicators, and describes the stakeholders and players pivotal to achieving the tasks.
