

Turning research into practice: suggested actions from case-studies of sexual and reproductive health research

2006. 104 p.

Organizations:

WHO. Department of Reproductive Health and Research

Description:

This document is the outcome of two meetings. The first meeting reviewed case-studies and other evidence related to research utilization from the standpoint of researchers and donors, while the second meeting reviewed additional materials from the standpoint of policy-makers and sexual and reproductive health programme managers. It is hoped that the information in this document will not only help researchers and others to increase the utilization of research findings, but also help them to monitor the extent to which research-based evidence is used for policy change and adoption of best practices to improve sexual and reproductive health.
