Measure Evaluation

Description:

The main objective of the ZSBS 2009 is to obtain national estimates of a number of key indicators (including international standardized indicators) important to monitoring progress of the national HIV/AIDS/STDs programme. The survey provides a rich set of indicators on HIV/AIDS/STI-related Knowledge, Attitudes, and Sexual Behaviour, as well as information on Orphans and Vulnerable Children, and assistance to households and communities affected by the HIV/AIDS pandemic. The 2009 ZSBS survey provides national estimates that can be disaggregated by residence (rural/urban), age groups (adolescents, youths, young adults and adults), and by sex (males, females).
