

## Recomendações para Terapia Antirretroviral em Crianças e Adolescentes Infectados pelo HIV

Brasília: 2009. 213 p.

### Organizations:

Brazil. Ministerio da Saude

### Collection:

Série Manuais, n. 85

### Description:

A partir de 1994, o Programa Nacional de DST e Aids passou a publicar o Guia de Tratamento Clínico da Infecção pelo HIV em Crianças, com as informações mais importantes sobre os avanços ocorridos nas orientações para o tratamento e acompanhamento das crianças infectadas e expostas ao HIV. Esse Consenso, revisto periodicamente pelo Comitê Assessor para Terapia Antirretroviral em Crianças Infectadas pelo HIV, tem incluído novos temas cada vez mais abrangentes, com o intuito de tornar-se uma referência para os profissionais que têm dificuldade de acesso a outras referências técnicas. Devido a essa complexidade sempre crescente, o Comitê Assessor foi subdividido em 7 subcomitês que desenvolveram diferentes temas: 1) manejo de crianças nascidas de mães infectadas pelo HIV e diagnóstico da infecção pelo HIV, 2) tratamento antirretroviral e adesão ao tratamento, 3) o adolescente vivendo com HIV e aids, 4) profilaxia e tratamento das infecções associadas à aids em crianças e adolescentes e infecções oportunistas, 5) imunizações, 6) cuidado integral e 7) comitê editor. Nesta nova versão, as Recomendações para Terapia Antirretroviral em Crianças e Adolescentes Infectados pelo HIV incluíram novos capítulos com assuntos que eram abordados anteriormente de forma mais superficial. O cuidado integral, a revelação diagnóstica, a importância do trabalho de adesão e um capítulo específico sobre os adolescentes são inovações trazidas para este texto.
