### Organizations:

Measure Evaluation

### Collection:

Working paper

### Description:

Mitigating HIV and AIDS among youth has been a major policy agenda both internationally and nationally, within Tanzania. Two concerns associated with mitigation efforts are increasing sexual activity at young ages and a burgeoning population of out-of-school youth whom poverty, lack of supervision, and unemployment seem to push into alternative life patterns that present risks to their health. This situation poses a serious challenge for Tanzania, where half the population is categorised as young.
